How to register for a webinar:

Members, it is recommended that you login first. Enter the email address linked for member benefits and password. You can click forgot password at any time to reset your own unique password. Then go to the event via Learn & Connect > Webinars. Select the event and submit your registration information.

If you are not logged in, the system does not know whether you are a member or not. The event registration screen will be similar to the one below:

Webinar Guest will appear to be the only registration option.
Click the red “Register” button and Submit your email address on the next page:

As long as you have entered the email address linked for member benefits, you will receive the following screen allowing you to select the member participant registration type. If the only option available is the guest registration type, the email address you are using (check for typos) is not linked for member benefits.
If your email address has not been linked to your organization’s membership bundle, check you’re your Philanos primary contact (bundle administrator) or email info@philanos.org for assistance.

If you do not belong to one of our affiliates and would like to attend a webinar, email info@philanos.org for an invitation to attend as a guest.
